

# Math Pathways from Middle to High School

\*Middle School Algebra is different than previous High School Algebra 1 classes.

\*\*Intermediate Algebra w/ Statistics is a **new** (fall 2011) high school course that covers quadratics, exponential functions, and statistics.

\*\*\*Algebra 2 is a required graduation course for students graduating in 2015 and beyond.

Math pathways and the courses offered after Algebra 2 with Trigonometry vary by high school.

\*\*\*\*To reach AP Calculus in high school, students must be course-accelerated during middle school or double up math courses by taking with Geometry with Proof and Algebra 2 with Trigonometry during the same school year.
